

## FLOOR ART

Please allow me to introduce Floor Art to you – a confluence of design and aesthetic sensibilities, characterized by an offering of readymade as well as customized carpets.

Illustrating the realization of our entrepreneurial ambitions, Floor Art represents our desire to showcase the mastery of Indian, Nepalese, and Tibetan craftsmen in the production and design of contemporary rugs. We own our manufacturing and weaving units in Nepal and India. Dealing with both readymade and completely bespoke carpets allows us the flexibility to cater to all our customer's whims and fancies, with an unyielding attempt to deliver products that are of the highest quality.

Over the years we have worked with renowned international designers such as Yoo Designs, Intarya, WOHA Architects Pte Ltd, etc. And the like in India, we have worked with architecture firms such as Design Emphasis, ZZ Architects, Talati Panthaky Associates, Faquih + Associates, Nozer Wadia & Associates, Hafeez Contractor & Associates and Rajiv Saini. Our projects range from private residences to hotels and commercial spaces, retail and office areas included.

At Floor Art, it has been our overriding objective to showcase the very best of Tibetan and Indian craftsmanship in the field of Hand Knotted, Hand Woven, Hand Loomed, and Hand tufted Rugs. By incorporating woolen yarns like New Zealand Wool, Sardinian Wool, as well as Silks like Banana Silk, Bamboo Silk, Raw Silk and Natural Fibers such as Ortie and Jute among others in our Rugs, we hope to ensure that our customers are offered an exhaustive selection that can easily blend into the aesthetic outlook they have visualized for the space in question. Further, our start-to-finish service approach means that the client is always in control of the process and production only commences upon approval of specifically produced samples for the client.

Please view our online catalog, which illustrates our design offering. Do let us know if any of these designs appeal to you, for your upcoming

projects. Alternatively, we could also work with designs provided by you. Thanks for visiting our website.
